ON FARM TRIAL RESULTS

CROSBY CLELAND

Brookmount Farm, Saintfield, Co Down

UK Sheep Farmer of the Year

Trialled HVS Liquid Gold Sheep® on 460 lambs, divided into three groups.

“The actual figures in the three groups of lambs clearly illustrated the effectiveness of using HVS Liquid Gold Sheep®.”

“DLWG recorded after just five weeks, compared to the Control Groups, showed a financial benefit of £1.50 per head over the cost of the product.”

“The extra trace minerals and vitamins provided by HVS Liquid Gold Sheep®, when used across our whole flock, will considerably shorten our finishing times.”

DR JOHN ORR MBE

Strangford, Co Down

TRIAL supervised by Dr John Orr MBE

154 lambs involved in the trial. 104 lambs Treated and 50 left as Control.

“The large group of 104 lambs that were treated with HVS Liquid Gold Sheep® had 50% more DLWG than the untreated lambs.”

“Treated lambs achieved finishing weight and were ready for market much sooner.”

A County Down Farmer recorded a greater lambing percentage up from 135% to 175%.

Another Sheep Breeder recorded 194% from 210 breeding ewes and 196% from 40 hoggets.

Both farmers reported a much tighter lambing period.

Value of extra gain

£2.07 per lamb
at **£3.80** per kilo dwt
